

EMS Policy

KLA is dedicated to complying with the appropriate and relevant environmental laws and standards such that its worldwide operations, including product development, sales, service and maintenance, are conducted in an environmentally responsible manner.

KLA is committed to preventing pollution and to the continual improvement of its environmental programs.

To carry out the Environmental Policy, we:

- Regularly evaluate the aspects of our operations and the impacts of these activities on the environment.
- Strive to improve the environmental performance of all our operations.
- Consider stakeholder's interests.
- Periodically review our environmental activities and progress toward meeting our defined goals and targets with management.
- Implement, maintain and document the Environmental Management System through all levels in the organization.
- Educate and train those who work on behalf of the organization, such as employees, contractors, and vendors, to work in an environmentally responsible manner.
- Promote this statement and make it available to the public and to all who work on behalf of the organization.

This environmental policy is communicated to all persons working for or on behalf of KLA and that may affect the company's environmental performance.
