- 3) In August of 1995, the Company repaid the \$20.0 million mortgage on its principal facility.
- 4) Net income per share is computed using the weighted average number of common and common equivalent shares outstanding during the respective periods, including the assumed net shares issuable upon exercise of stock options, when dilutive.

A two-for-one stock split was declared by the Board of Directors on July 24, 1995. The stock split was in the form of a 100% stock dividend. The dividend was paid on September 29, 1995, to stockholders of record on August 31, 1995. Earnings per share was calculated on a post-split basis.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

The following discussion and analysis may contain forward-looking statements that reflect the Company's current judgment regarding the matters addressed by such statements. Because such statements apply to future events, they are subject to risks and uncertainties that could cause actual results to differ substantially. Important factors that could cause actual results to differ are described in the following discussion and are particularly noted under "Future Operating Results" at page 9.

Results of Operations

Third Quarter and Nine Months of Fiscal 1996 Compared with Third Quarter and Nine Months of Fiscal 1995

Net Sales

Net sales increased 59% and 64%, respectively, for the three and nine month periods ended March 31, 1996 compared to the same periods of the prior fiscal year. The WISARD and RAPID business units were primarily responsible for the increase in net sales. The Company attributes the continuing increase in WISARD's sales primarily to the growing acceptance of the Company's in-line wafer monitoring equipment that allows semiconductor manufacturers to optimize device yields. The increase in RAPID sales reflects the ongoing industry-wide retooling for advanced reticle manufacturing. The Metrology Group and Automated Test Systems business unit also recorded significant increases in net sales.

Gross Margin

Gross margins were 54.6% and 54.8%, respectively, for the three and nine month periods ended March 31, 1996 compared to 54.1% and 53.2% for the same periods of the prior fiscal year. Increased gross margins in the RAPID business unit accounted for most of the overall improvement. The Company attributes this increase primarily to volume efficiencies and learning curve improvements.

Engineering, Research and Development

Engineering, research and development expenses were 11.2% and 10.9% of net sales, respectively, for the three and nine month periods ended March 31, 1996 compared to 10.4% and 9.6% for the same periods of the prior fiscal year. Net engineering expenditures rose \$8.6 million and \$25.3 million, respectively, during the three and nine month periods ended March 31, 1996 compared to the same periods of the prior fiscal year. The Company is concentrating on the broad opportunities in yield management, including the networking of all measurement

tools in a fab, the development of new measurement tools and the related software for using those tools. The WISARD business unit accounted for 57% and 44% of the dollar spending increase, respectively, for the three and nine month periods ended March 31, 1996. The next largest dollar increase was recorded in the Metrology Group, which accounted for 14% and 23% of the dollar spending increase, respectively, for the three and nine month periods ended March 31, 1996. Smaller increases in dollar spending were also recorded in the RAPID, PRISM and SEMSpec business units.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Selling, General and Administrative

Selling, general and administrative expenses were 17.9% and 18.1% of net sales, respectively, for the three and nine month periods ended March 31, 1996 compared to 18.3% and 19.5% for the same periods of the prior fiscal year. Sales, general and administrative spending was up significantly in dollar terms as the Company began establishing a direct sales force in Japan and also strengthened its sales force in other regions. However, the Company did realize some economies of scale due to the strong increase in revenues.

Interest Income and Other, net

Interest income and other, net for the three months ended March 31, 1996 was flat with the comparable period of the prior fiscal year due primarily to lower yields on the Company's investment portfolio offset by higher average cash balances. Interest income and other, net increased by \$5.0 million for the nine month period ended March 31, 1996 compared to the same period of the prior fiscal year. The increase was due to higher average cash balances and higher yields on the Company's investment portfolio.

Provision for Income Taxes

The Company's effective tax rate increased to 36% for the three and nine month periods ended March 31, 1996. The Company's tax rate was 34% for the year ended June 30, 1995. This rate increase is due primarily to the lower impact of the realization of previously reserved deferred tax assets and the expiration of the federal research and development tax credit on June 30, 1995.

The IRS is currently auditing the Company's federal income tax returns for fiscal years 1985 to 1992. The Company has received a notice of proposed tax deficiency. Management believes sufficient taxes have been provided in prior years and that the ultimate outcome of the IRS audit will not have a material adverse impact on the Company's financial position or results of operations.

Future Operating Results

The Company's future results will depend on its ability to continuously introduce new products and enhancements to its customers as demands for higher performance yield management and process control systems change or increase. Due to the risks inherent in transitioning to new products, the Company must accurately forecast demand in both volume and configuration and also manage the transition from older products. New product introductions involve the integration of complex systems and components in order to obtain customer acceptance. Failure to complete the integration process on a timely basis could result in delays in customer acceptance and deferrals of net sales to future periods. The Company's results could also be affected by the ability of competitors to introduce new products which have technological and/or pricing advantages. The Company's results also will be affected by strategic decisions made by management regarding whether to continue particular product lines, and by volume, mix and timing of orders received during a period, fluctuations in foreign exchange rates, and changing conditions in both the semiconductor industry and key semiconductor markets around the world. As a result, the Company's operating results may fluctuate, especially when measured on a quarterly basis.

Liquidity and Capital Resources

Cash, cash equivalents, short-term investments and marketable securities decreased \$33.1 million at March 31, 1996 compared to June 30, 1995. Cash provided by operations was \$13.8 million. This was offset by the repayment in full of the Company's \$20 million mortgage on its principal facility, and by \$27.3 million in capital expenditures. Cash provided by operations was substantially less than reported earnings, primarily due to investments in accounts receivable and inventories. Accounts receivable increased \$98.0 million

due primarily to an overall increase in net sales. Additional factors were higher than normal shipments to Japan, where payment terms are longer, and non-linear shipments in the quarter ended March 31, 1996. Inventories increased \$51.2 million to support the increase in net sales and the ramp-up of new products. Capital expenditures were primarily for computer equipment to accommodate the planned introduction of the Company's new enterprise business systems, engineering computers and equipment to support KLA's rapidly expanding research and development efforts, plus continued expenditures for facilities expansion. Other current liabilities increased \$34.8 million primarily due to increases in accrued warranty costs associated with higher shipment volumes and increases in accrued compensation and benefits. The Company believes that its current level of liquid assets, credit facilities and expected cash generated from operations are sufficient to fund growth through the next fiscal year.
